WORK EXPERIENCE

Rippey.ai Kathmandu, Nepal

Implementation Engineer

22/04/2024 – Current

- Implemented features and configurations tailored to client requirements using JavaScript, MongoDB, and integrated third-party APIs, ensuring alignment with business goals.
- Redesigned workflow architecture by consolidating multiple API calls into bulk API requests, reducing processing time by over 30% and significantly improving system efficiency.
- Worked extensively on implementation of AP Automation and ECU workflow including Paycargo Integrations.
- Communicated with clients to gather requirements, understand challenges, and provide optimal, customized solutions.
- Conducted end-to-end manual testing to ensure implementations met client specifications and quality standards.
- Monitored production dashboards to identify and report issues, analyze errors, and evaluate use cases for effective troubleshooting and resolution.

Support and Sales Engineer

01/01/2025 – Current

- Acted as the primary point of contact for client support issues, performing triage and escalating critical problems to internal teams for timely resolution.
- Contributed in enhancing the triage process to reduce support resolution time from 1 week to 3 days average.
- Assessed system performance and reviewed error logs using Grafana to proactively prevent and resolve service disruptions.
- Coordinated with cross-functional teams to diagnose and resolve client-reported issues efficiently.
- Prepared and customized dashboards to be demo-ready for the sales team, aligning with client requirements and business objectives.

AMNIL Technologies Pvt Ltd Kathmandu, Nepal

Software Engineer Intern

02/08/2023 – 12/11/2023

- Developed and deployed APIs using Express with CRUD operations, PostgreSQL, and MongoDB.
- Implemented chatbot solutions using Botpress integrated with React for front-end visualization.
- Collaborated with cross-functional teams to deliver user-focused software products.

PROJECTS

Peace Pod: A mental Well being Web App

A final year academic project along with report on the mental wellbeing web app delivering various features such as Meditation Techniques and Calm Music to Users. Tech stack used: Express (Node.js), React.
