Professional Experience

RIPPEY.AI

Remote

Implementation Engineer

Apr 2023 - Present

- Implemented AI driven workflows and configurations tailored to client requirements using JavaScript, MongoDB, and integrated third-party TMS APIs, ensuring alignment with business goals in the logistics industry.
- Worked on prompt engineering and skills development for agentic services used for the product, focusing on performance, relevance, and alignment with business requirements.
- Redesigned workflow architecture by consolidating multiple API calls into bulk API requests, reducing processing time by over 50% and significantly improving system efficiency.
- Communicated with clients to gather requirements, understand challenges, and provide optimal, customized solutions.
- Conducted end-to-end workflow testing to ensure implementations met client specifications and quality standards.

Support and Sales Engineer

Jan 2025 - Present (Concurrent)

- Acted as the primary point of contact for client support issues, performing triage and escalating critical problems to internal teams for timely resolution.
- Contributed in enhancing the triage process to reduce support resolution time from 1 week to 3 days average.
- Assessed system performance and reviewed error logs using Grafana to proactively prevent and resolve service disruptions.
- Prepared and customized dashboards to be demo-ready for the sales team, aligning with client requirements and business objectives.

AMNIL Technologies

Lalitpur, Nepal

Software Engineer Intern

Feb - Apr 2024

- Developed and deployed multiple APIs using Express with CRUD operations with PostgreSQL and MongoDB, Authentications(JWT, Oauth).
- Developed chatbots using Botpress which responds to queries and fetch necessary data from API and display the data using React.

Technical Skills

Programming: C++, Java, Python, HTML, CSS, Javascript, React, Django, Express, Prompt Engineering, Agentic Skills

Databases: PostgreSQL, MySQL, MongoDB

Tools : Spreadsheets, GSuite, looker studio, Grafana, Opensearch Dashboards, Agentic Coding

Education

Koblenz University

Master of Science in Web and Data Science

Koblenz, Germany

2025 - Present

Tribhuvan University

Bachelor of Science in Computer Science and Information Technology.

Average Percentage - 71.8%

Kathmandu, Nepal

2020 - 2024

Projects

Peace Pod : A mental well-being web app

Technology Used : Python (Django), React, Pytorch, PostgreSQL

Features: JWT authentication, Integration of frontend with backend API. Neural Network implemented in a chatbot.

Ecommerce Bookstore and API

Technology Used : Express, React, PostgreSQL, HTML, CSS

Features : Dynamic updation and deletion of data. UI of the e bookstore with display of dynamic data in multiple pages. OAuth and JWT authentication. Validation in both frontend and backend API. CRUD operations with PostgreSQL DB
